Early Activity System

Colourful, comfortable, supportive seating system for children aged 18 - 48 months.

Product Features

Early Intervention.

Activity Development Programme developed by Leckey based on clinical research.

Cushioned floor mat.

Soft-to-touch, anti-bacterial, colourful fabric and easy to maintain covers which are machine washable and tumble dry safe.

Supplied with an easy to carry duffle bag.

Comes as standard with the Activity Development Programme, playmat, sitting support, trunk wedge, head support, 2 positioning straps, 2 medium rolls, 2 small rolls and Squiggles duffle bag.

Key Positions

Back lying (supine)

Tummy lying (prone)

Side lying

Floor sitting (long sitting)

Hands and knees (four point kneeling)
Squiggles Seat

Squiggles meet all the postural and comfort requirements of a seating system for young children with special needs, while maintaining a fun, colourful design.

Base Options

- Hi-Low Chassis (footpedal operated)
- Easy Chassis (manually adjusted)
- Ottobock Discovery wheelchair base
- Ottobock Kimba buggy base
- Tendercare Snappi Base

Product Features

- Smallest of Leckey’s family of clinically based seating systems.
- 4-point pelvic harness is adjustable to give a secure, stable base of support and is cushioned for the child’s comfort.
- Flexible sacral cushion which can be shaped to the child’s lower back, supports the lower spine in the desired position by encouraging a degree of forward tilt in the pelvis and lower trunk extension.
- Contoured shoulder support angle adjusts to provide shoulder protraction which helps balance the head, the trunk and the pelvis.
- Adjustable footplate, which can be tilted to the preferred angle, ensures that the feet are well supported, providing a secure base for maximum upper body function. The footplate flips away to allow for easy transfers.

</tr>
</tbody>
</table>

**Product Features**

Second size in Leckey’s family of clinically based seating systems.

- 4-point harness on the pelvic harness and pelvic cradle ensures the user stays in the correct anatomical position for optimum support.

- The flexible sacral support works with the hip guides and adjustable seat angle to provide the optimum achievable posture for the pelvis.

- A flexible scoliosis can be managed by using the lateral supports in conjunction with the pelvic harness to provide 3-point positioning.

- The leg guides can accommodate up to 30° windsweeping, as well as abduction and adduction.

**Base Options**

Hi-Low Base
Indoor and outdoor options available.
(Gas spring, hydraulic or powered.)

The following seat and base options have passed the crash test:

- Leckey Tour
- Ottobock Discovery (Base)
- Ottobock Kimba
- Ottobock Skippi
- Ottobock B400
- Rea Azalea
- Invacare Spectra XTR
- Invacare Spectra Blitz
- Invacare Blade
- Convaid EZ-18

**Base Options**

KIT Hi-Low Base
- Hydraulic or Powered option.

The following seat and base options have passed the crash test:
- Leckey Tour
- Ottobock Discovery (Base)
- Ottobock B400
- Rea Azalea
- Invacare Spectra XTR

**Product Features**

Largest of Leckey’s family of clinically based seating systems.

KIT’s 3-part backrest, can accommodate clients with scoliosis, kyphotic and lordotic postures.

Up to 20° windsweeping can be accommodated as well as real or apparent leg length discrepancies.

Unsurpassed proximal pelvic positioning can be achieved using the pelvic cradle.

Internal/external rotation, varus/valgus and plantar/dorsiflexion can be accommodated by the multi-adjustable foot supports.

Multi-adjustable complex lateral supports can contour to varying thoracic shapes, in both a horizontal and vertical orientation, increasing surface area contact for improved postural support and comfort. They can be flipped out of the way to facilitate transfer.

Removable covers that can be machine washed & tumble dried.

Interchangeable backrests and various headrest options, including Whitmyer.
Everyday Activity Seat

Strong, durable, practical and adjustable seating system for kids and young adults aged 1 - 18 years.

Base Options
- Basic Chassis (manually adjusted)
- Hi-Low Chassis (footpedal operated)
- Hi-Low Hydraulic Chassis (footpedal operated)
- Hi-Low Powered Chassis (handset operated)

Product Features
- Developed specifically for children and young adults with moderate postural needs.
- 4-point harness gives a secure, stable base of support, cushioned for comfort and can be adjusted to ensure a mid-line position.
- The wide range of height adjustment on the hi-low base means that it goes low enough for standing transfers or high enough for sitting at a school desk or home dining table.
- Easy care - the brightly coloured covers can be removed and machine washed.
- A range of height and angle adjustable chest laterals are available.
- The height and angle adjustable footplate can be flipped up to facilitate transfer.
- Integral push handle.

**Technical Details**

Designed for children aged 1 - 12 years with mild postural needs.

Available in four bright colours, it gives improved stability which helps reduce fatigue, allowing the child longer periods of concentration and fine motor activity.

PAL: Posture+Attention=Learning.

Two-point lap belt and side pads for lateral stability. An optional ramped cushion can be added if children need a little extra help to keep pelvis and femurs in alignment.

Where a less upright angle is required, the backrest angle and armrests adjust to suit the child’s needs, and along with the large tray or table, provide appropriate posterior and anterior support.

In the classroom environment, the matching table provides a large surface for anterior support, feeding, writing and other table top activities.

For small children, the optional high seat frame converts Pal size 1 to a high chair, ideal for feeding and inclusion at family meal times.

The seat depth is adjustable for maximum femoral support, and when children need additional help to maintain the alignment of their femurs, a pommel is available.

Lower leg and foot support is provided by the height adjustable legs and footplate, contributing to pelvic stability.

The armrests are height-adjustable.

Leeway Pelvic Cradle

The Leeway Pelvic Cradle is an ergonomically designed pelvic harness which increases pelvic stability for wheelchair users, thereby improving upper body function and comfort.

Product Features

- Neoprene pieces allow front straps to spring back for ease of transfer.
- Side pockets for gel inserts with pull-up straps.
- Polycarbonate insert (not visible) ensures Leeway does not collapse when not in use, making transfer easier.
- Adjustable Velcro tabs on each side enables Leeway to accommodate a range of postures and shapes.
- Attaches to standard wheelchairs at 4 points. Brackets supplied which can attach to most wheelchair bases. Additional Brackets available.
- Unique design of Velcro strap which fits around the cushion ensures Leeway cannot slide backwards or forwards.
